

# ADEVET

## DESCRIPTION

Vitamin A, D3 and E in injectable solution.

## TECHNICAL PROPERTIES

**ADEVET** is a vitamin complex with a quick long term effect, composed of vitamin A, vitamin D3 and vitamin E which are absorbed quickly by the organism due to the characteristics of the oily carrier. Once the desired effect is achieved the vitamin excess is stored in the liver thus extending the effect of **ADEVET**.

Vitamin A plays a part in the growth and development of embryos. It is required in the production of rhodopsin, the visual pigment used in low light levels. Vitamin A is essential to maintain epithelial tissues intact as a physical barrier to infection; it is also involved in maintaining a number of immune cell types. Vitamin D3 regulates the calcium and phosphorus levels in blood. Promotes bone formation and mineralization. Vitamin E avoids lipid peroxidation and intervenes biochemically in the reproduction.

## INDICATIONS AND SPECIES

Intended for pigs, sheep, goats and cattle in the treatment and prevention of vitamin deficiencies that cause sterility, fecundation disturbances, delays in the development of the fetus and young animals, rickets and osteomalacy. It can also be used complementary in anti-infectious treatments.

## COMPOSITION

Vitamin A	60.000 I.U.
Vitamin D3	30.000 I.U.
Vitamin E	25 mg
Excipient to 1 ml.	

## DOSAGE

PIGS	Piglets: 0.5 ml	Adult: 2 ml.
SHEEP AND GOATS	Young: 0.5 ml	Adult: 2 ml
CATTLE	2 ml every 100 kwl	

## INCOMPATIBILITIES

Do not mix with aqueous products.

## CONTRAINDICATIONS

Not described.
