

PIROPLASMIN

DESCRIPTION

Acriflavine solution for topical, intra-uterine and injectable use.

TECHNICAL PROPERTIES

Acriflavine is an equimolecular mix of chloromethylene and 33-6 diaminoacridine chlorhydrate. It has antibacterial activity for Gram positive and Gram negative bacteria, even when organic material and pus are present. It is also recommended as local antiseptic for wounds, burns and metritis. It has antiprotozoary activity for pyroplasms. After intravenous administration, it is removed through the urine and milk.

INDICATIONS AND SPECIES

Intended for sheep, goats and cattle for the treatment of pyroplasmosis, metritis and wounds.

COMPOSITION

Acriflavine	60 mg
Excipient to	1 g

DOSAGE

TOPICAL USE: dilute PIROPLASMIN in water or physiological serum and apply it to wounds.

INTRAVENOUS INJECTION: apply 3 ml/10 k.l.w., equivalent to 1.8 ml/ k.l.w. by slow intravenous injection.

INTRA-UTERINE: dilute PIROPLASMIN in water or physiological serum to a solution of 3% and wash with 150 to 450 ml.

INCOMPATIBILITIES

Do not mix with phenolic solutions. The solution of Piroplasmin in physiological serum precipitates after 36 hours.

CONTRAINDICATIONS

Do not administer in animals with hypersensitivity. Some animals can develop photosensibilization.

OVERDOSAGE

Intravenous overdose or a quick injection can cause circulatory shock.

PACKAGING

100 ml glass vials.
